ARGENTIX (AGX)

CRYPTO-ASSET WHITE PAPER | V 1.1

Regulation (EU) 2023/1114 – Title II / Annex I

Draft date: 6 November 2026

STATUS: CONSOLIDATED WHITE PAPER WITH SOURCED ENVIRONMENTAL DISCLOSURE. Requires issuer sign-off and completion of formal notification requirements.

FIRST-PAGE REGULATORY STATEMENT

This crypto-asset white paper has not been approved by any competent authority in any Member State of the European Union. The offeror of the crypto-asset is solely responsible for the content of this crypto-asset white paper.

MANAGEMENT BODY STATEMENT [SIGN-OFF REQUIRED]

The management body must approve and include the statement required by Article 6(6) of Regulation (EU) 2023/1114 confirming compliance and that, to the best of its knowledge, the information is fair, clear and not misleading and contains no omission likely to affect its import. This statement has not yet been authorised.

TABLE OF CONTENTS

Summary; A Offeror; B Project; C Public offer; D Crypto-asset; E Rights and obligations; F Technology; G Risks; H Sustainability; I Regulatory information; Annex: Filing checks.

SUMMARY

This summary should be read as an introduction to this white paper. Any decision to purchase AGX should be based on this white paper as a whole, not this summary alone. The offer to the public of AGX does not constitute an offer or solicitation to purchase financial instruments; any such offer or solicitation may only be made through a prospectus or other offer documents in accordance with applicable national law. This white paper does not constitute a prospectus under Regulation (EU) 2017/1129 or any other offer document under Union or national law.

Argentix (AGX) is an SPL token on Solana intended to provide access to services supplied by JULIETTE GROUP LTD and to serve as consumable credits within the Argentix ecosystem. None of the planned services is currently operational. AGX used for a service is transferred back to the company, not burned. The initial stated supply is 100,000,000 AGX, and the issuer may mint more. The planned initial offer is directed at the Lithuanian public, for 70,000,000 AGX at EUR 0.70 per AGX, with a minimum purchase of 1 AGX. The proposed sale runs from 7 December 2026 to 5 November 2027, subject to all legal prerequisites. AGX is not redeemable at a guaranteed euro value. AGX may lose some or all value, may not be transferable or liquid, and may not be usable for the promised services, especially if the project fails. AGX is not covered by investor compensation or deposit guarantee schemes.

A. INFORMATION ABOUT THE OFFEROR

A.1 Issuer and offeror: JULIETTE GROUP LTD, a private limited company incorporated in England and Wales on 1 October 2026, company number 17493479. Registered office: 71–75 Shelton Street, Covent Garden, London WC2H 9JQ, United Kingdom. Website: https://www.argentixgroup.com. Email: info@argentixgroup.com. Director and sole shareholder: Giulia Pari (issuer-confirmed; corporate register evidence to be attached).

A.2 Financial position as represented by the offeror as of 6 November 2026: registered share capital GBP 1,000; paid-up share capital GBP 0; unpaid share capital GBP 1,000; no loans, external financing, other reported debts, revenue or expenses; no approved annual accounts because the company was incorporated on 1 October 2026. The sole shareholder and 100% owner is Giulia Pari. The company has not completed its first financial year. [VERIFY these figures against company registers and accounting records; unpaid subscribed share capital may require balance-sheet presentation].

A.3 The company is developing an ecosystem of software applications, self-service terminals, POS-related software and hardware, and related digital services. No such service is operational at the draft date. The issuer expects initial availability within approximately one year.

B. INFORMATION ABOUT THE PROJECT

B.1 AGX is intended as a utility credit usable only for eligible services supplied within the Argentix ecosystem. It may unlock access to specified software functionalities or be spent to obtain eligible services. When AGX is spent, it is transferred to a company-controlled wallet and is not burned. Tokens returned to the company may be retained and resold in later years, but will not be added to the 7 December 2026–5 November 2027 public offering allocation. Future sales are subject to applicable legal requirements.

B.2 The planned ecosystem comprises an app, self-service totems, POS-related software and compatible devices. These are development plans, not claims of present availability. No services are operational as of 6 November 2026. Individual credit prices and access terms will be determined as the relevant products are completed and must be disclosed before users can consume AGX. The issuer expects the planned services to become available within approximately one year, subject to development and regulatory constraints. Specific service prices (for example, the number of AGX required for a duration of software access) will be set when each product is completed. No particular conversion ratio is guaranteed before publication of service terms.

B.3 Offering proceeds are intended for hardware research and development, manufacture and distribution, related software, marketing and advertising, staff, rent, administration and company operations. No guaranteed allocation percentages are represented.

C. INFORMATION ABOUT THE OFFER

C.1 Intended audience: public in Lithuania initially. Future expansion to other EU countries is not part of the present offering and will require separate legal and disclosure assessment. Lithuania is the intended home Member State [VERIFY legal home-state determination for UK-incorporated offeror].

C.2 Intended notification date: 6 November 2026 [NOT CONFIRMED AS ACTUALLY FILED]. Intended opening: 7 December 2026; intended closing: 5 November 2027. Publication must occur after the Article 8 notification interval and before the public offer. The utility-token 12-month limit, where applicable, is calculated from publication, not notification.

C.3 70,000,000 AGX are allocated to the initial offer. Fixed offer price EUR 0.70 per AGX; minimum purchase 1 AGX (EUR 0.70); no predefined maximum purchase, subject to applicable checks. EUR 0.70 represents a 30% commercial

discount relative to the issuer's intended later selling price of EUR 1.00, not a promised future market value or redemption price. Maximum theoretical gross proceeds if the entire allocation sells: EUR 49,000,000, not a forecast.

C.4 Payments are intended in EUR through bank transfer and/or card where payment facilities are operational [VERIFY provider and payment terms]. Funds will be managed through dedicated company banking arrangements [VERIFY actual accounts and any legally required safeguarding].

C.5 Delivery is intended within 24 hours after confirmed payment and completion of applicable compliance checks to the purchaser's compatible Solana wallet. The issuer pays blockchain network fees for initial delivery. Incorrect wallet details, network incidents and legally necessary checks may delay delivery; handling of such delays must be stated in purchaser terms.

C.6 The issuer intends to request enhanced AML/KYC documentation for purchases above 1,000 AGX. Checks may be required below this threshold as well; the threshold is not a statutory exemption. [VERIFY the company's actual AML, sanctions, payments and service-provider obligations].

C.7 Where Article 13 MiCA applies, retail purchasers have a 14-calendar-day withdrawal right, subject to statutory exceptions. Requests: info@argentixgroup.com. Any token return and refund process must preserve mandatory rights and deadlines. Withdrawal is subject to Article 13 MiCA, including statutory exceptions. The issuer will reimburse valid withdrawals within the statutory period using the same means of payment unless expressly agreed otherwise, without imposing fees, and may coordinate return of delivered tokens without diminishing statutory rights..

C.8 Unsold AGX remain the property of the company and will not be burned. The company intends to cancel the offering only in the event of dissolution/closure or exceptionally serious circumstances, without prejudice to mandatory suspension or cancellation. If the offer is cancelled, affected purchasers will be notified promptly through the official website and by their available contact details. Any funds due back shall be refunded under applicable law. Cancellation or suspension shall respect applicable mandatory law, with prompt notification and any reimbursement required by law..

C.9 The final white paper will be freely available and prominently displayed at https://www.argentixgroup.com before purchases open. The purchase function must not be enabled before all legal conditions are satisfied.

D. INFORMATION ABOUT AGX

D.1 Name: Argentix; symbol: AGX; blockchain: Solana; token standard: SPL; decimals: 2. Mint address confirmed by offeror: 7vp3vQbd5YDnJ4A8Bb2gnR4iwjHKetJhLpqPsFrkkn4L. [ON-CHAIN CONFIGURATION CONFIRMED BY OFFEROR; INDEPENDENT EVIDENCE NOT ATTACHED].

D.2 Initial stated supply: 100,000,000 AGX. Allocation: 70,000,000 public offer (70%); 15,000,000 Team & Bonus (15%); 15,000,000 Treasury & Ecosystem (15%). Team and treasury allocations have no stated lock-up. These allocations do not imply current circulating supply. [CURRENT SUPPLY/BALANCES TO BE DOCUMENTED IN THE NOTIFICATION FILE].

D.3 The issuer intends to retain mint authority and may issue additional AGX beyond 100 million. No fixed maximum future supply is represented. Additional minting may affect scarcity and the relative holdings of token holders. [REQUIRED: verify current authority address, controls, issuance governance, any limitations, and notification/disclosure policy].

D.4 The issuer has stated that freeze authority may be used for security, fraud prevention or legal obligations. [VERIFY whether freeze authority is active, authority address, operational criteria and controls].

D.5 The issuer intends to classify AGX as a utility token under MiCA Article 3(1)(9). AGX is not intended to track the euro, provide monetary redemption, represent a financial instrument, confer company ownership, interest or dividends.

[REQUIRED: documented legal classification assessment; issuer confirmation alone is not dispositive].

E. RIGHTS AND OBLIGATIONS

E.1 A holder may use AGX for eligible issuer-supplied services when operational, or to unlock designated access rights under published service terms. AGX consumed for services is transferred to the issuer, not destroyed. The precise service pricing and conditions will be established upon completion of each product. Planned service availability is within approximately one year; precise service conditions are to be published before activation..

E.2 AGX grants no equity, corporate voting rights, dividends, profit participation, interest or guaranteed return. No right to redeem AGX for EUR 1 or another fixed amount is granted, without prejudice to statutory rights.

E.3 AGX may be transferred on Solana subject to the actual token configuration, wallet compatibility, potential freezing and applicable law. No exchange listing or liquidity is guaranteed.

F. TECHNOLOGY

F.1 AGX is an SPL token on the Solana public blockchain. Solana uses proof of stake and proof of history mechanisms. Solana network operation is outside the issuer's control.

F.2 Compatible wallets are needed for receipt and use. Transactions may be irreversible; users must secure their private keys. Mint/freeze powers may be compromised or exercised in ways adverse to holders. [REQUIRED: on-chain validation and actual custody/key security disclosures].

G. RISKS

G.1 Total or partial loss of token value; lack of secondary-market liquidity; non-transferability; development delay or project failure; no presently operating services; inability to use credits; issuer insolvency; issuer operational and funding shortfalls; mint dilution; issuer freeze powers; compromised administrative keys; wallet/key theft; irreversible transactions; Solana outages; software/hardware defects; payment-provider failure; regulatory reclassification; changes to law; cancellation of the offering; uncertainty of future services and timing.

G.2 AGX is not covered by EU investor compensation schemes under Directive 97/9/EC or deposit guarantee schemes under Directive 2014/49/EU.

H. SUSTAINABILITY INFORMATION — REGULATION (EU) 2025/422

H.1 Disclosure entity (S.1): JULIETTE GROUP LTD. Relevant legal entity identifier (S.2): LEI not provided; company registration number 17493479 is not an LEI. Crypto-asset (S.3): Argentix (AGX), SPL token on the Solana network.

H.2 Consensus mechanism (S.4): Solana uses stake-weighted proof of stake, Tower BFT and proof of history as a cryptographic clock. Scheduled leaders produce entries and validators submit stake-weighted votes. Incentive mechanism (S.5): validators and delegators receive staking rewards, subject to validator commissions; transactions incur SOL-denominated network fees, including possible prioritisation fees.

H.3 Reference period: S.6 26 October 2025; S.7 26 October 2026. The following measurements concern the underlying Solana network, not AGX-specific energy consumption. S.8 annual energy consumption: 6,296,250 kWh/year. S.10 renewable energy consumption: 38.583113996%. S.11 energy intensity: 0.00000 kWh (rounded published estimate of marginal consumption per additional transaction). S.12 Scope 1 DLT GHG emissions: 0.00000 tCO2e/year. S.13 Scope 2 DLT GHG emissions: 2,133.60452 tCO2e/year. S.14 GHG intensity: 0.00000 kgCO2e (rounded published estimate of

marginal emissions per additional transaction). Rounded zero intensities do not mean that the network has no environmental impact.

H.4 Sources and methodologies (S.9, S.15, S.16): Bank Frick AG, Solana SOL ESG Data, https://www.bankfrick.li/en/solana-sol (accessed 6 November 2026). The energy estimate uses a bottom-up model of network nodes, observed client software requirements, measured hardware consumption in certified laboratories and estimated validator/network participation. Renewable share and emissions estimates use geographical distributions of nodes, national electricity mixes and carbon-intensity reference data from Ember, Energy Institute and Our World in Data. The source discloses assumptions and conservative estimates. Solana Foundation / Crypto Carbon Ratings Institute provides supplementary methodological context: https://climate.solana.com/methodology . No independent AGX-specific environmental audit has been performed. The source values have been transcribed and cross-checked against the cited disclosure; they have not been independently re-measured or certified by JULIETTE GROUP LTD.

H.5 Because estimated annual electricity consumption exceeds 500,000 kWh, the supplementary indicators under Table 3 of Commission Delegated Regulation (EU) 2025/422 are included above. The values are estimates subject to methodological uncertainty and should be reviewed upon material changes.

I. REGULATORY INFORMATION

I.1 This document is drafted under Regulation (EU) 2023/1114, Title II and Annex I. Intended home Member State: Lithuania [LEGAL BASIS TO BE VERIFIED]. Planned initial host Member States: none; initial public offer directed only at Lithuania.

I.2 The notification under Article 8 must include a reasoned classification explanation addressing exclusion from MiCA, e-money token and asset-referenced token status. [SEPARATE ACCOMPANYING EXPLANATION REQUIRED].

I.3 The final white paper must contain the actual notification date, approved management statement, complete required Annex I/template fields, and compliant machine-readable XHTML/iXBRL tagging under Implementing Regulation (EU) 2024/2984. No competent authority has approved this draft.

I.4 Article 8 generally requires notification at least 20 working days before publication, not merely before sales begin. Verify the calendar and actual filing before announcing a publication date.

ANNEX — MANDATORY FINAL FILING CHECKS

1. Verify actual filing status/date and permissible publication date.

2. Verify Lithuania as home Member State for the UK company and the intended territorial scope.

3. Attach corporate/accounting evidence for the disclosed financial position and obtain management-body sign-off.

4. Attach documentary/on-chain evidence of mint address, supply, mint authority and freeze authority (offeror confirms technical verification).

5. Specify concrete rights, service availability, token-consumption and pricing mechanisms, and credible development timeline.

6. Complete statutory withdrawal/refund, offer suspension/cancellation and purchaser terms.

7. Sustainability figures sourced and cross-checked against Bank Frick 2026; transpose to the applicable structured EU template and review at filing.

8. Complete every mandatory field of the official Annex I / ITS template and prepare validated XHTML/iXBRL.

9. Produce the separate Article 8 classification explanation and verify whether any proposed services trigger additional authorisation requirements.
